

English for Librarian and Archivist

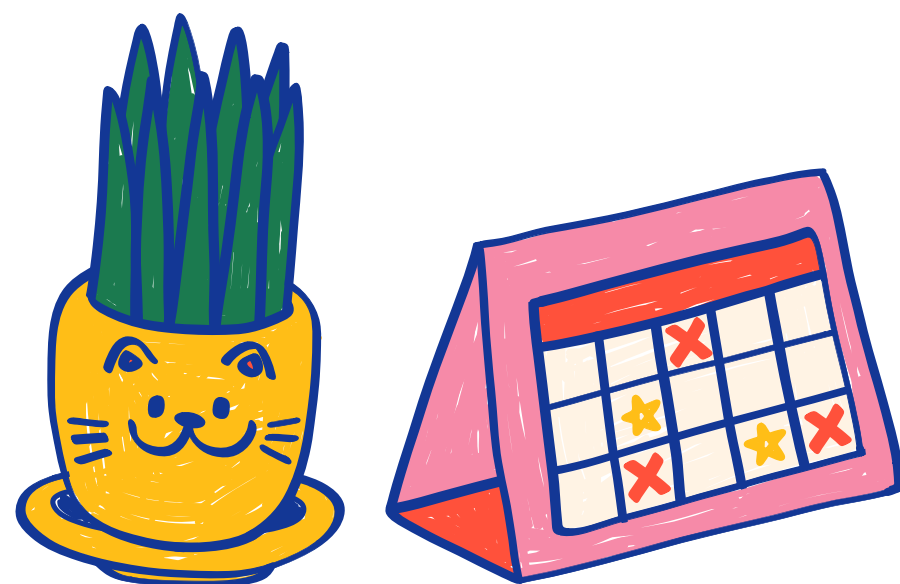

LIBRARIAN TASK

Titis Meilita [13040124130069]

Welcome!!!

Task 1

[Collection Development]

- Librarians determine and provide collections needed by library users.
- Adapt collections based on scientific developments and emerging research needs.
- Ensure collections remain relevant, up-to-date, and aligned with user demands.

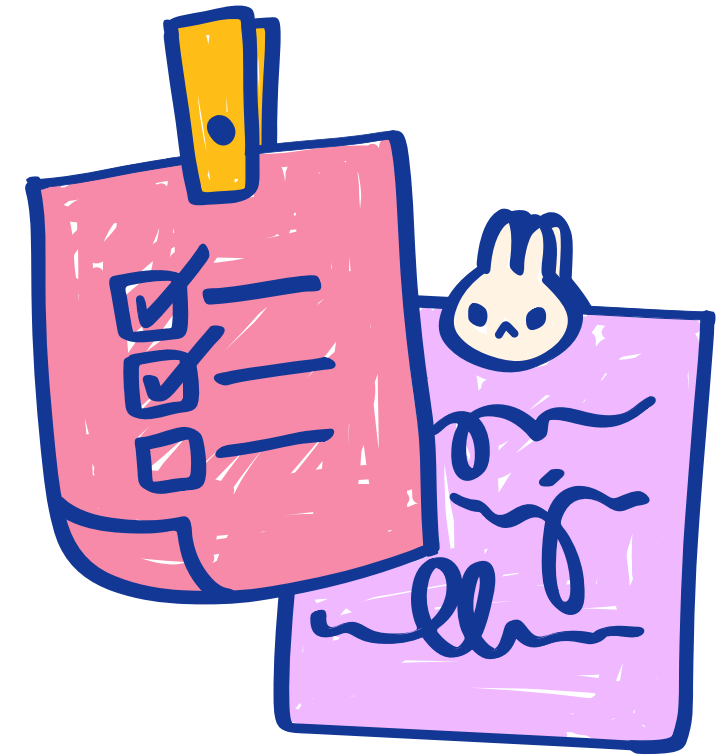

TASK II [Knowledge Organization]

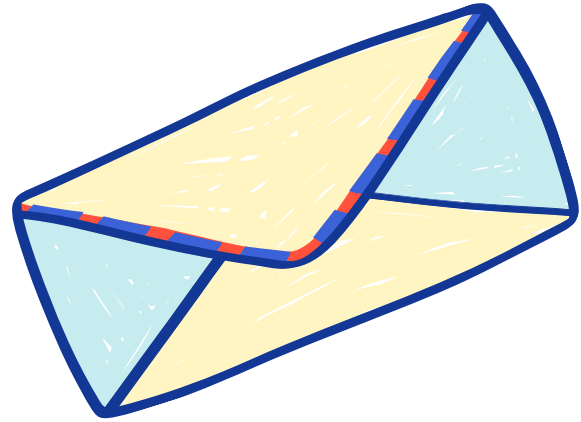

- Processing library materials to enable easy retrieval and access.
- Cataloging: creating descriptions and recording physical data of collections.
- Classifying collections using subjects and keywords via standard systems (e.g., DDC).
- Organizing information so users can efficiently locate what they need.

TASK III

[Preservation]

- Maintaining collections to ensure their durability and long-term usability.
- Prevent document damage through regular maintenance and repair of damaged materials.
- Properly store collections to facilitate long-term access and use

TASK IV

[User Services]

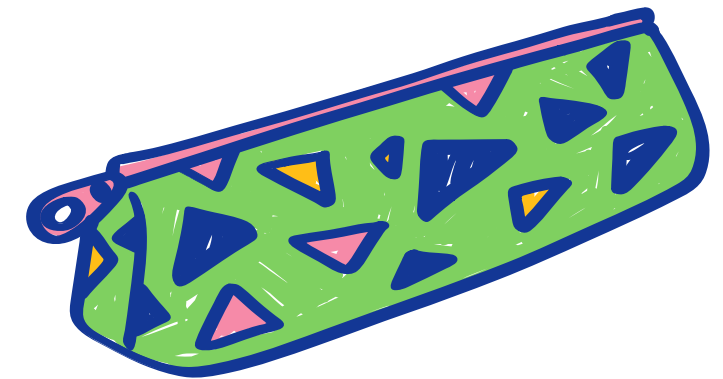

- Librarians act as information service providers for users.
- Circulation services
- Reference services

TASK V

[Research]

- Librarians contribute to library and information science through research.
- Conduct research to improve library services and information management.
- Write articles or scientific papers related to librarianship.
- Assist with literature reviews and act as co-investigators in research teams.
- Develop service innovations based on research findings.

TASK VI

[Education & Training]

- Modern librarians act as educators helping users search and use information properly.
- Teach information literacy to help users evaluate and use information effectively.
- Train users in journal databases such as ScienceDirect for academic research.
- Provide education on citation and plagiarism using tools like Mendeley or Zotero.
- Conduct workshops and research training for students and researchers.

THANK YOU

See you next time!
